

The tracks are bent to the following shape of the window frame as closely as possible.

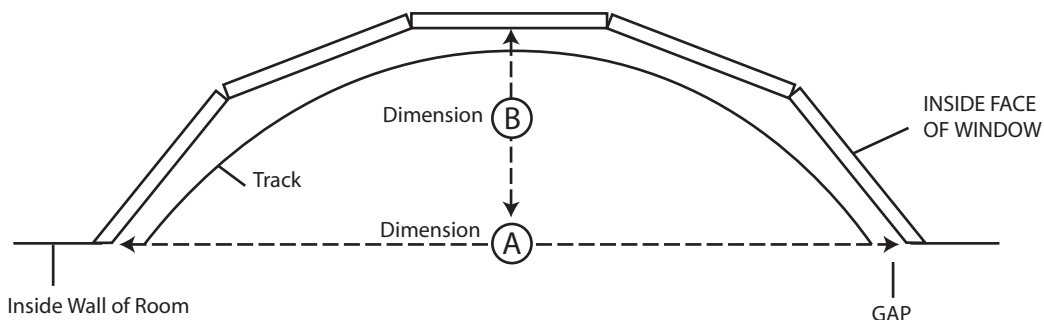

**WITH RECESS / REVEAL ORDER:**

The diagram shows the measurement we need to manufacture a curved track

**When fitting, the track is drawn back from the window frame into the recess/reveal walls, by the amount needed for vanes to turn. The ends of the track fit neatly to the wall leaving approx. 10mm clearance.**

**NO RECESS / REVEAL ORDER:**

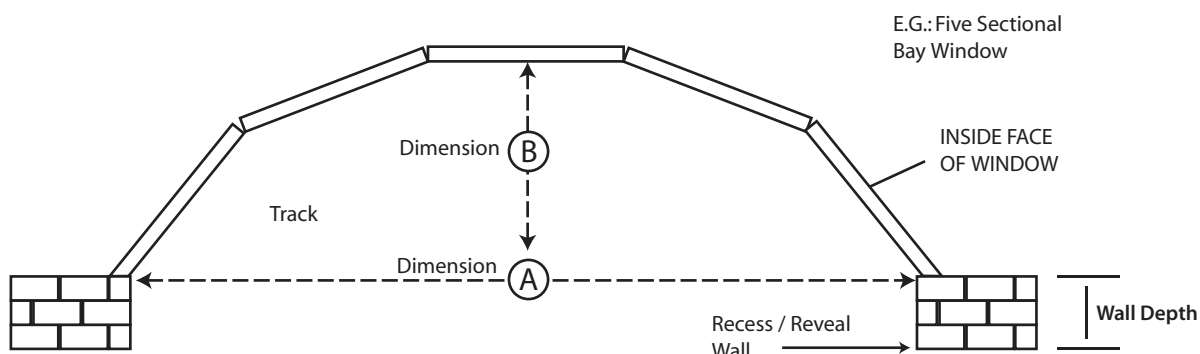

**The track is cut approx. 3" or 75mm shorter at each end. This is so that it does not stick out into the room. There is always a gap down the sides with this type of order.**

**BLIND SIZE:**

**If Blind size is indicated we will make the track finished to the sizes given.**

		Please indicate as required Sizes in: mm / inches		
Dimension A		Dimension B		A + B =
89mm	127mm		White	Brown
			Silver available Not recommended	
Split	Left Draw	Right Draw	Track in 2 halves Yes / No (for deep curves i.e. $B \times 3 = A +$ )	
Controls:	Left	Right		
Vanes required Yes / No			Fabric Yes / No	
Cord Drop			Recess (Reveal) wall: Yes / No / Blind size * <i>Must be completed</i>	
More order forms required			Date sent	

**PLEASE NOTE:**

Measure Dimension A as you would for a normal recess.  
 Dimension B is from the centre of the A line to the inside face of the window frame (Tight size).

Tracks will be made to the sizes given or templates provided with a 15mm tolerance.

Hockeystick/unusual shapes – templates required please.
