Blind Cord Loops Safety Caution EN13120

As members, we fully endorse the BBSA's Make it Safe code. Children or other vulnerable persons can be at danger from strangulation by unrestrained loops in cords and chains that are attached to window coverings. To avoid entanglement keep cords out of reach. Safety devices must be fitted and are supplied as standard. Move cots and furniture away from window coverings.

IMPORTANT

Please ensure measurements of recess walls are given both on this form and on your template.

Please indicate size and position of window handles on your template.

Submit Form

IF NOT A FIVE PANE BAY, A FULL SIZE TEMPLATE IS REQUIRED

IF THERE IS NO RECESS OR IS NOT AS DIAGRAM PLEASE ADVISE.

PLEASE NOTE:

Measure Dimension A as you would for a normal recess. As shown above. Dimension B is from the centre of the A line to the inside face of the window frame (Tight size). Tracks will be made to the sizes given or templates provided with a 15mm tolerance.
